

ALUMINIUM CUT BUR COATED - SYNOPSIS

- ◎ **Introduction:** WC/C Coating

- ◎ **Coating Offers:**

- Reduced tooth wear
- Reduced heat build-up
- Reduced cutting forces due to better lubrication

- ◎ **Features & Benefits:**

Specifically developed coating offers:

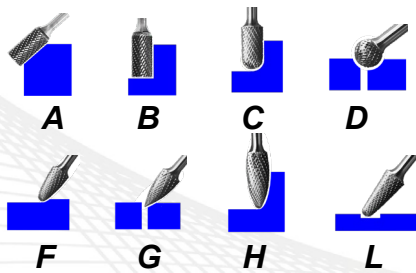

- Improves 'chip' removal - Allowing rapid stock removal
- Low friction properties - Reduces clogging of bur teeth
- Reduces loading on cutting edge - Ensuring smooth cutting operation

All these advantages result in extended bur life of the tool

- ◎ **Range Details:**

- 8 shapes available

- 5pc bur kit available

- ◎ **Industry target:**

- Aerospace
- Automotive
- Railway
- Marine
- Foundries
- Die & mold
- Power Generation
- Oil & Gas

- ◎ **Applications**

- Rapid stock removal on a non-ferrous materials e.g. Aluminium & Soft Plastics
