

BASE METAL RANGE - SYNOPSIS

Introduction:

- Bur geometry designed for general purpose applications on ferrous materials

Features & Benefits:

- Advanced cutting geometry to suit
 - Allowing rapid stock removal
 - Increasing production output
 - Resulting in a smoother operation
 - Breaking down the material removed efficiently
- CNC machined - high consistent quality
- Manufactured to strict quality control standards - incorporates 100% inspection of brazed joints
- Combination of ATA air tool with BM geometry - gives a guaranteed smoother grinding operation

Range Details:

- 10 shapes available

Industry target:

- Aerospace
- Automotive
- Railway
- Marine

Applications

- Rapid stock removal on a broad spectrum of materials e.g. low carbon steels, copper and brass
